Revenant Multipage Site

- DOM must be rebuilt & JS parsed on every navigation.

- Page navigation requests full page HTML. For old browser, server returns previously concatenated <head> + header + footer + navigation + content.

- In new browser, s.w. intercepts, streams <head> + header + footer+ navigation from cache immediately, then content from cache or network.

browser engine → service worker → server proxy → server

service worker → cache, cache

server proxy — cache
